

# büchiglasuster – the safe choice

## büchiglasuster is

- The leading manufacturer of instruments and equipment for the chemical and pharmaceutical industries.
- A well-established Swiss company with more than 60 years of experience and know-how.

## büchiglasuster glass reactors and autoclaves are

### Safe

They comply with the most stringent international safety standards, e.g. the EC machinery directive, ATEX, PED and TA Luft, guaranteeing a high level of operating safety.

### Robust

High-quality materials such as borosilicate glass, glass lined steel and tantalum give Büchi reactors unique characteristics in terms of resistance to corrosion, high temperature and pressure.

### Durable

Committed to Swiss quality – büchiglasuster reactors have a very long service life, low maintenance costs and short machine downtimes during product changes, resulting in an excellent return on investment.

### Individual

Whatever the chemical or pharmaceutical process involves, the modular design means büchiglasuster equipment can be adapted to meet any challenge.

### Flexible

The unique «büchiflex» system is unrivalled in its flexibility, safety and leak-tightness, including when used in a vacuum.

### Innovative

To benefit our customers, we are constantly in search of new solutions and innovations. Whether it's new materials, coatings, compounds or new areas of application, our expert staff continues to do everything they can to enable us to bring you the safest, most efficient and most flexible reactors in the world.

« Büchi equipment is characterised by flexibility, long life and high quality. That's why Büchi AG has been our first choice ever since the company began bulk production in 1982. »
